Latex printing is now even more affordable with the new 42 inch and 60 inch models. You too can experience the many benefits of these revolutionary printers;

Go Green

Gain a competitive edge and increase your business opportunities with the latest environmentally friendly print technology.

Inks contain no HAPs (Hazardous Air Pollutants) and low VOC emissions (Volatile Organic Compound) meaning no extraction and no expensive waste disposal are required.

Latex ink cartridges and printheads consumables are fully recyclable, even the machine is 85% recyclable by weight!

Eyecatching Durable Graphics

Outstanding image quality of up to 1200 dpi and wide colour gamut help to create eyecatching signs and graphics for a diverse range of indoor and outdoor applications.

The prints have durability up to 5 years laminated and 3 years unlined. Vehicle wrap prints can be produced and fitted within minutes.

Competitive Edge

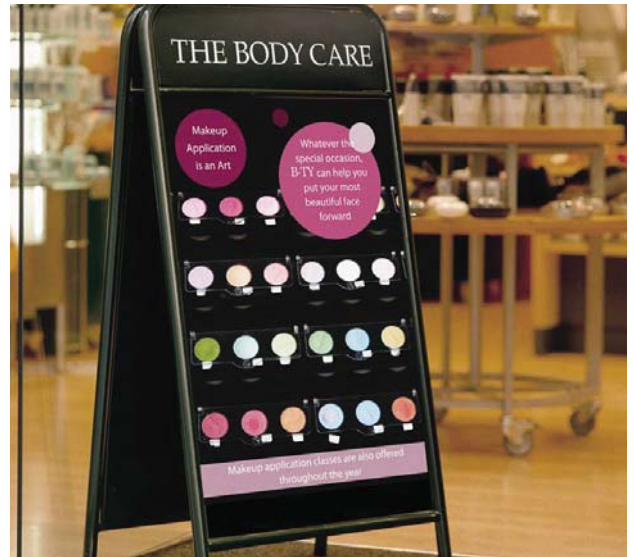

Increase your productivity with instantly curable inks. When customers demand graphics now, your prints come off the printer dry and immediately ready for lamination, packaging or display. **As there are no solvents, there is no need for lengthy out-gassing procedures**

Produced graphics are odourless making the prints suitable for use within sensitive environments including restaurants, medical facilities or fitness centres.

Book your Demo with William Smith

Established in 1832, William Smith have always built great relationships with our customers. Our background in sign and graphic manufacturing ensures we have a comprehensive knowledge in large format printing.

We can support you throughout your investment with printer profiles, materials and inks compatible for your machine. We provide the excellent back up and after sales support that you need over the lifetime of your printer.

Find out more about how you can benefit from these revolutionary printers at our open days this month. Call us on 01833 694707 to register your place today
